

DAgeSCOPE

a new IT tool developed by DAHER

(Le Havre – June 2009) Thanks to **DAgeSCOPE**, DAHER has won a new market which consists in specialised equipment flow management.

Two functions have been deployed:

- ⇒ "Track & Trace": Import and export expeditions' management
- ⇒ Specific function of "forecast management"

Those functions are decision making tools to define the positioning of the best container in the best timeframe in order to optimize the tanks fleet management.
